

MOTOTRBO's DM3600 digital conventional mobile radio is ideal for professional organizations that need a customizable, business-critical communication solution using licensed spectrum. This mobile provides clearer voice communications and easy migration from analog to digital.

Superior Audio Quality

- **Digital Audio quality** — Provides clearer voice communications over a greater range than comparable analogue radios with digital error correction and static and noise rejection.

Versatile

- **Offers twice the calling capacity** for the price of one license using TDMA technology.
- **Software configurable** for analogue or digital operation— facilitating a smooth migration from analogue to digital.
- **Integrates both voice and data** in the radio to increase operational efficiency and support a wide range of applications.

Efficient

- **Multi-coloured LED** for clear visible feedback of calling, scanning and monitoring features.
- **Emergency button** alerts supervisor or dispatcher in an emergency situation.
- **Accessory connector** supports USB and enhanced audio capability.
- **Programmable side buttons** for easy access to favorite features such as one-touch dialing.

Basic Model Includes:
